Physics of the Earth and Planetary Interiors, 53 (1989) 445–447
Elsevier Science Publishers B.V., Amsterdam – Printed in The Netherlands

CONTENTS VOLUME 53, 1988–1989

Letter Section

Centroid-moment tensor solutions for July–September 1987
A.M. Dziewonski, G. Ekström, J.H. Woodhouse and G. Zwart (Cambridge, MA, U.S.A.) 1

Earthquake swarms as short-term precursors in the Dalton–Gunning region, 34.70–34.86°S, 149.11–149.26°E, New South Wales, Australia
M. Michael-Leiba, J. Weekes and C. Krayshek (Canberra, ACT, Australia) and V. Klein (Dalton, NSW, Australia) 12

Research Papers

Global seismicity of 1982 and 1983: additional centroid-moment tensor solutions for 553 earthquakes
A.M. Dziewonski, G. Ekström, J.E. Franzen and J.H. Woodhouse (Cambridge, MA, U.S.A.) 17

Inversion of magnetovariation event to causative current. I. Current sheet model
X.-S. Wang (Edmonton, Alb., Canada) 46

Inversion of magnetovariation event to causative current. II. Channelled currents and programming techniques in parametric inversion
X.-S. Wang (Edmonton, Alb., Canada) 55

Inversion of magnetovariation event to causative current. III. Test of channelled current model, SABC conductor inverted as channelled currents and structure evaluation
X.-S. Wang (Edmonton, Alb., Canada) 64

Large intermediate-depth earthquakes and the subduction process
L. Astiz and H. Kanamori (Pasadena, CA, U.S.A.) and T. Lay (Ann Arbor, MI, U.S.A.) 80

Thermal history of the Earth: a corollary concerning non-linear mantle rheology
F.D. Stacey (Brisbane, Qld., Australia) and D.E. Loper (Tallahassee, FL, U.S.A.) 167

Comments

Comments on 'Observation of shrinkage cracks in ocean floor titanomagnetites' by Nikolai Petersen and Hojatollah Vali
C. Radhakrishnamurty (Bombay, India) 175

'A transverse conductive structure in the Northwest Himalaya', by B.R. Arora and M.V. Mahashbade
R.P. Singh (Kanpur, India) and L.B. Pedersen (Uppsala, Sweden) 177

Book Reviews

Paleomagnetism and the Continental Crust by J.D.A. Piper—E. Irving 180

Turbulence and Random Processes in Fluid Mechanics by M.T. Landahl and E. Mollo-Christensen—F.H. Busse 181

Statistics for Geoscientists by D. Marsal—R.M. Clark 181

Statistical Analysis of Spherical Data by N.I. Fisher, T. Lewis and B.J.J. Embleton—J.T. Kent 182

The Structure of the Planets by J. Elder—D.J. Stevenson 183

Probability and Statistics in Geodesy and Geophysics by L. Kubackova, L. Kubacek and J. Kukaca—K.R. Koch 184

Corrigendum 186

Special Issue: Electromagnetic Induction
Guest Editors: S.-E.O. Hjelt and G.R. Jiracek

Preface iii
Contents v

Research Papers
Electromagnetic induction in regions under stress
S.O. Ogunade (Ile-Ife, Nigeria) 187
Methods used in the U.S.S.R. to reduce near-surface inhomogeneity effects on deep magnetotelluric sounding
M.N. Berdichevsky, L.L. Vanyan and V.I. Dmitriev (Moscow, U.S.S.R.) 194
Natural and man-made EM variations in the Komló coalfield
A. Ádám, L. Szarka and J. Verő (Sopron, Hungary) 207
Geomagnetically induced currents in the Finnish 400 kV power transmission system
R. Pirjola (Helsinki, Finland) 214
Laboratory electromagnetic modelling of the subducting Juan de Fuca Plate
H.W. Dosso, W. Nienaber and J. Chen (Victoria, B.C., Canada) 221
Comparison of geoelectrical/tectonic models for suture zones in the western U.S.A. and eastern Europe: are black shales a possible source of high conductivities?
W.D. Stanley (Denver, CO, U.S.A.) 228
The use of data-adaptive filtering for noise removal on magnetotelluric data
M. Hattingh (Hermanus, South Africa) 239
Geomagnetic variation anomalies in north-western Italy
E. Bozzo (Genova, Italy) and A. Meloni (Roma, Italy) 255
LOTEM data processing for areas with high cultural noise levels
K.-M. Strack, T.H. Hanstein and H.N. Eilenz (Koln, F.R.G.) 261
A portable ELF-MT system for shallow resistivity sounding
T. Fujii, H. Komori and Y. Honkura (Tokyo, Japan) 270
Anisotropy in electromagnetic field variations and its implication for lateral inhomogeneity of the electrical conductivity structure
Y. Honkura, N. Watanabe, Y. Kaneko and S. Oshima (Tokyo, Japan) 278
Calculations of voltages for magnetotelluric modelling of a region with near-surface inhomogeneities
H.E. Poll, J.T. Weaver (Victoria, B.C., Canada) and A.G. Jones (Ottawa, Ont., Canada) 287
Collection, exchange and distribution of geomagnetic data through the World Data Centres
E.P. Kharin (Moscow, U.S.S.R.) 298
Computer modelling of geomagnetic anomalies associated with block-faulting
G.C. Onyedim (Ile-Ife, Nigeria) 300
A high-density remote reference magnetic variation profile in the Pacific northwest of North America
J.F. Hermance, S. Lusi, W. Slocum, G.A. Neumann (Providence, RI, U.S.A.) and A.W. Green, Jr. (Denver, CO, U.S.A.) 305
Telluric and magnetotelluric study of the Ferrara High (northern Italy)
V. Iliceto (Padova, Italy), R. Malaguti, G. Santarato (Ferrara, Italy), P.-A. Schnegg and G. Fischer (Neuchâtel, Switzerland) 320
Induction in a model ocean
D.E. Winch (Sydney, N.S.W., Australia) 328
Source field problems in northern parts of the Baltic Shield
I.L. Osipova, L.L. Vanyan (Moscow, U.S.S.R.) and S.E. Hjelt (Oulu, Finland) 337

On applicability of the Tikhonov–Cagniard magnetotelluric model for sounding of a non-uniform medium
D.B. Avdeev, E.B. Fainberg and B.Sh. Singer (Troitsk, U.S.S.R.) 343
Electromagnetic induction by ocean currents: BEMPEX
A.D. Chave, J.H. Filloux and D.S. Luther (La Jolla, CA, U.S.A.) 350
The analysis of single site induction data
W.D. Parkinson (Hobart, Australia) 360
Application of the Rayleigh–FFT technique to magnetotelluric modeling and correction
G.R. Jiracek, R.P. Reddig and R.K. Kojima (San Diego, CA, U.S.A.) 365
A magnetotelluric profile across the western boundary of the Salton Trough in northern Baja California, Mexico
M. Martinez, J.M. Romo, R. Fernandez, C. Herrera (Ensenada, Mexico), G.R. Jiracek, V. Weslow and M.J. Miele (San Diego, CA, U.S.A.) 376
A rapid inversion technique for transient electromagnetic soundings
P.A. Eaton and G.W. Hohmann (Salt Lake City, UT, U.S.A.) 384
The Tasman Project of Seafloor Magnetotelluric Exploration: experiment and observations
F.E.M. Lilley, I.J. Ferguson, N.L. Bindoff (Canberra, A.C.T., Australia), J.H. Filloux (La Jolla, CA, U.S.A.) and P.J. Mulhearn (Darlinghurst, N.S.W., Australia) 405
OFFSHORE EMSLAB: objectives, experimental phase and early results
J.H. Filloux (La Jolla, CA, U.S.A.), L.K. Law (Sidney, B.C., Canada), T. Yukutake, J. Segawa, Y. Hamano, H. Utada (Tokyo, Japan), A. White (Bedford Park, S.A., Australia), A. Chave (Murray Hill, NJ, U.S.A.), P. Tarits (Paris, France) and A.W. Green (Denver, CO, U.S.A.) 422
A moving finite element method for magnetotelluric modeling
B.J. Travis (Los Alamos, NM, U.S.A.) and A.D. Chave (Murray Hill, NJ, U.S.A.) 432

Contents of Volume 53 445
